Important information _

Caution

Risk of electronic shock Do not open

To reduce the risk of electronic shock, do not remove cover (or back).

No user-serviceable parts inside.

Refer service to qualified Repair Technician or Repair Center.

Read the following context indicated by the following symbol to the left. It indicates important literature in operating the product.

Read the following context indicated by the following symbol to the left. It indicates a potential high voltage hazard that may compromise your safety.

Caution

Take caution when moving the product on a cart. Quick stops, excessive force, and uneven surfaces may cause the display unit and cart combination to overturn.

Caution

To prevent electric shock, match wide blade of plug to wide slot, fully insert.

Caution

This product satisfies FCC regulations when shielded cables and connectors are used to connect the unit to other equipment. Prevent electromagnetic interference from electrical appliances such as radios and televisions. Please use shielded cables and connectors for connections.

Warning

FCC Regulations state that any unauthorized changes or modifications to this equipment not expressly approved by the manufacturer could void the user's authority to operate this equipment.

Important safety precautions _

Cleaning

Remember to unplug the AC cord from the AC outlet before cleaning the display unit. And do not use liquid cleaners or aerosol cleaners to clean the display.

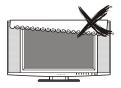

Stand

Do not place the display unit on an unstable place. The TV may fall resulting in serious personal injuries to nearby people as well as damage to the display unit.

Ventilation

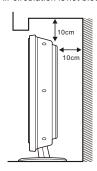

Do not cover or block these vents and openings located on the top and back of the display. Inadequate ventilation may cause overheating and shorten the lifespan of the display. Do not place in an enclosed area such as a built-in shelf, unless proper ventilation is provided or the manufacturer's instructions are followed. Keep the distance of 10cm minimum between the display unit and wall. Never install the display unit as indicated in the picture below.

Air circulation is blocked

Air circulation is not blocked

Never insert objects or spill liquid into the display unit

Never insert any object into the display unit through openings or spillliquid on the display unit. High voltage flows in the display unit, and inserting an object can cause electric shock and/or short internal parts.

Keep away from water and moisture

Do not placethe display in areas where moisture is present or where the unit may get wet such as bathrooms, kitchen, pool area or in a wet basement.

Keep away from heat sources

Keep the displayunit away from heat sources such as radiators, heaters, stoves and other heat-generating products.

The liquid crystal panel used in this product is made of glass

Do not hit the panel. Becareful to prevent from getting hurt by broken glass pieces in case the panel breaks.

Follow operating instructions

All operating instructions must be followed.

Servicing

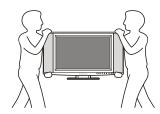

Do not attempt to service the display unit yourself unless specified by the manufacturer.

Failure to this rule will void the warranty of the unit. Removing covers expose you to high voltage and other dangerous conditions.

Request a qualified service technician to perform the service.

Precautions when transporting the display

Carrying the display requires two or more people.

Attachments

Do not use attachments not recommended by the manufacturer. Use of inadequate attachments may result in accidents to nearby poeple or to the unit.

Power source

This product must operate on a power source specified on the specification label. If you are not sure of the type of power supply used in your home, consult your dealer or local power company. For units designed to operate on batteries or another power source, refer to the operating instructions.

AC cord protection

The AC cords must be routed properly to prevent people from stepping on them or objects from resting on them. Check the cords at the plugs and product.

Wall mounting

Be sure to install the display unit according to the method recommended by the manufacturer. Use only the mounting hardware recommended by the manufacturer.

Overloading

Do not overload AC outlets or extension cords. It may result in electric shock or start a fire.

Replacement parts

In case the display unit needs replacement parts, make sure that the service technician uses replacement parts specified by the manufacturer, orthose with the same characteristics and performance as the original parts. Use of unauthorized parts can result in fire, electric shock and/or other danger.

Safety checks

Upon completion of service or maintenance, request the service technician to perform safety checks to ensure that the display unit is in proper operating condition.

Repair

When the display unit displays an abnormal condition, any noticeable abnormality in the display unit indicates that the display unitneeds servicing. If any of the following conditions occurs, unplug the AC cord from the AC outlet, and request a qualified service person to perform repairs.

- **1.**A liquid was spilled on the display unit or objects have fallen into the display unit.
- 2. The display unit has been exposed to rain or water.
- 3. The display unithas been dropped or damaged.

Environment

The display unit only operates within the temperature 0°C to 40°C. Operation outside of the recommended may cause damage to your product.

FCC Statement

FCC notice

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in aresidential installation. This equipment generates, uses and can radiateradio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment of fand on, the user is encouraged to try to correct the interference by one or more of the following measures:

- 1. Reorient orrelocate the receiving antenna.
- 2. Increase the separation between the equipment and receiver.
- 3.Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- 4. Consult the dealer or an experienced radio/TV technician for help.

Modifications not expressly approved by themanufacturer could void the user's authority to operated the equipment under FCC rules. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- 1. This device may not cause harmful interference.
- This devicemust accept any interference received, including interference that may cause undesired operation.

For Canadian model

This Class B digital apparatus complies with Canadian ICES-003.

Identifying Front and Rear Panels

Front Panel

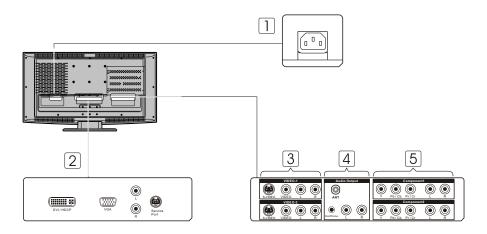

VOL+/VOL- Adjusts volume

SOURCE Press to switch the input sources

IR SENSOR Contains Infra-red light for digital data transmission by the remote control. Please point remote control at IR Sensor for function

Identifying Front and Rear Connectors

Rear Panel

- **AC IN** power cord connects here.
- 2 DVI/HDCP and VGA Port: This display includes a DVI input that receives analog or digital video signals through the interface for the display of high quality digital video signals. The DVI portis HDCP (High Bandwidth Digital Content Protection) compliant and is fully compatible with video equipment that features the HDCP function. The VGA input can be used for analog RGB signals from a HD Receiver or personal computer. Resolutions supported are VGA, SVGA, XGA and WXGA. DVI and VGA share Audio L/R inputs.

Service Port is reserved for manufacturer use. Incorrect use may damage the Display.

3 Video 1,2 These inputs can be used for the connection of a VCR, Super VHS(S-VHS) VCR, DVD player, or other video devices to the TV. There is a Video and an S-Video input for Video 1 and Video 2.

When the S-Video jacks are plugged into either Video 1 or Video 2, it will take precedence over the Video jack.

3 (Cont'd)

The display will automatically detect the input jack being used.

NOTE: The S-Videoinput has a better quality of picture than a composite Video signal.

4 Antenna (ANT) Antenna receives signals from VHF/ UHF antennas or a cable system.

Audio Out The Audio Output sends the TV's connected audio signals to an A /V receiver or other equipment. Display features a R / L stereo.

5 Component 1, 2 These inputs can be used for the connection of A /V equipment with component video outputs, such as a DVD player, Digital Satellite Receiver, or compatible Video Game System.

Descriptions of Connector Types

You may find it necessary to use some of the following connector types during setup.

75-ohm coaxial cable Used for TV cable connection .

S-Video Cable High quality video cable for enhanced picture quality.

Audio/Video Cable

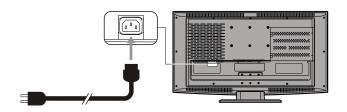

Some DVD players are equipped with the following three video connectors:

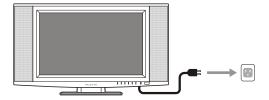

Connecting the Power Cord

Complete other connections prior to connecting the power cord:

1. Connect the power cord to the ACIN connector of the TV

2. Connect the other end of the power cord to the wall outlet.

Installation

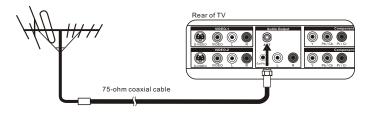

In the following pages, you will find directions on how to install your tv and choice of video equipment.

- Connecting to an Antenna or Video Equipment with Antenna outlet
- Connecting to a VCR
- Connecting to an Audio Receiver/Home Theater System
- Connecting to a DVD Player with A/V or S-Video Cables
- Connecting to a DVD Player with Component Cables
- Connecting to a Satellite Receiver or Cable Box with A/V Cables
- Connecting to a Satellite Receiver or Cable Box With Component Connectors
- Connecting to a PC with VGA, and a DVD Player with DVI / HDCP Cables
- Other Connections

Connecting to an Antenna or Video Equipment with Antenna outlet

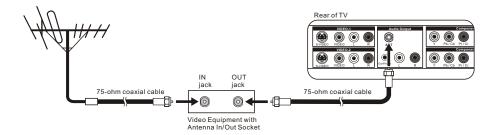

⚠ Disconnect all powersources before making any connection.

1.Connect a 750hm coaxial cable onto the ANT input on the back of the TV's right sidepanel.

If connecting to Video Equipment with Antenna outlet

1.Using a 75-ohmcoaxial cable (orchoice of Antenna Cable), connect the cable box's OUT jack to the TV's ANT jack (RF Terminal).

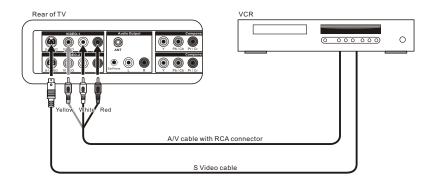

Connecting to a VCR

⚠ Disconnect all power sources before making any connections.

Use this hookup if you subscribe to a cable TV system that does not require a cable box.

1.Using A/V cable and S-Video cables, connect the VCR's Audio and S Video OUT jacks to the TV's Audio and S-Video In jacks.

Connecting both Video IN or S-Video IN

Note: Use this method of connection if you subscribe to a cable TV system that does not require a cable box.

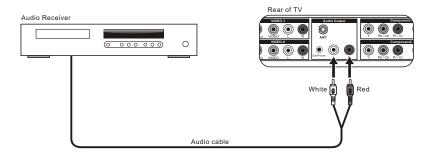

S-Video is strongly recommended for use if your VCR or video equipment has it. S-Video input has a better quality of picture than a composite Video signal.

Note: You can also use the Video 2 jacks located on the TV rear to connect additional video equipment.

Connecting to an Audio Receiver / Home Theater System

⚠ Disconnect all power sources before making any connections.

1.Using an audio cable, connect the TV's audio OUT jack to the audio receiver's audio IN or AUX IN jacks.

Note: When connecting an Audio output signal, an external Audio amplifier is necessary to amplify the signal for external speakers.

Note: If the audio out is hooked up to a home theatre sound system, please disable the audio in the OSD by selecing off in audio section. Volume adjustment must be made on the home theatre receiver. By not disabling the TV's speaker it could damage the speakers or TV itself.

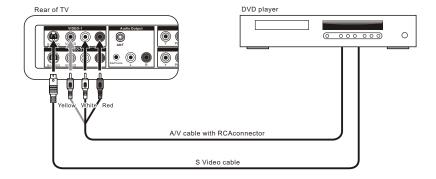

Connecting to a DVD Player with A/V or S-Video Cables

⚠ Disconnect all power sources before making any connections.

Note: Use this method of connection if your DVD player does not have component (Y, Pb, Pr) jacks.

Note: If your DVD player has component video output connectors, for best picture quality, use the connection described for *Connecting to a DVD Player With Component Connectors*. (See page. 17)

- 1.Using an A/V cable, connect the DVD player's Audio OUT jacks to the TV's Audio IN jacks.
- $2. Using \ an S-Video \ Cable, connect \ the \ DVD \ player's \ S-Video \ OUT \ jack \\ to \ the \ TV's \ S-Video \ IN jack.$

Note: S-Video is strongly recommended foruse if your VCR or video equipment has the option .S-Video input has better quality of picture than a composite Video signal.

Note: You can also use the Video 2 jacks located on the TV rear to connect additional video equipment.

Connecting to a DVD Player With Component Cables

⚠ Disconnect all power sources before making any connections.

Note: Use this method of connection if your DVD Player has component (Y, Pb, Pr) jacks.

1. Using a component video cable, connect the DVD Player's Y, Pb and Pr jacks to the Y, Pb and Pr jacks on the TV.

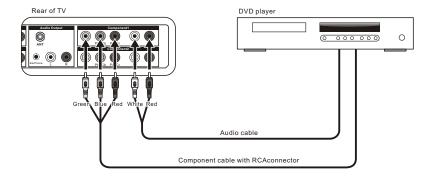

Colors on Component Video connectors:

Y: Green

Pb (also identified as Cb, CB or B-Y): Blue **Pr** (also identified as Cr, CR or R-Y): Red

Note: The Y, Pb and Pr jacks on your DVD player are sometimes labeled as Y, Cb and Cr, or B-Y and R-Y. If so, connect the cables to the matching colors.

2.Using an Audio cable, connect the DVD player's Audio OUT jacks to the TV's Audio in jacks.

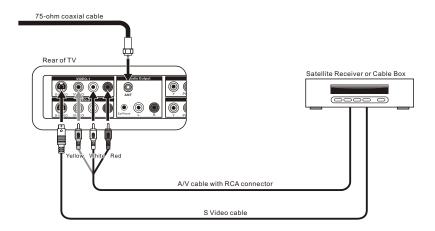

Note: The Y, Pb and Pr jacks do not provide audio, so audio cables must be connected to provide sound.

Note: The YPbPrconnection provides the best quality of video signal compared to AV (Composite) and S-Video connection.

Connecting to a Satellite Receiver or Cable Box with A/V Connectors

⚠ Disconnect all power sources before making any connections.

- 1. Using Audio and S Video cables, connect the satellitereceiver's Audio and S Video OUT jacks to the TV Audio and S Video IN jacks.
- Connect a 75-ohm coaxial cable from your cable or antenna to the TV Ant (Antenna) jack.

Note: S-Video isstrongly recommended for use if your VCR or video equipment has it because S-Video input has better quality of picture than a composite Video signal.

Note: You can also use the Video 2 jacks located on the TV rear to connect additional video equipment.

Connecting to a Satellite Receiver or Cable Box With Component Connectors

⚠ Disconnect all power sources before making any connections.

Use this hookup if your Satellite Receiver or Cable Box has component (Y, Pb, Pr) jacks.

1. Using a component video cable, connect the Satellite Receiver or Cable Boxes' Y, Pb and Pr jacks to the Y, Pb and Pr jacks on the TV.

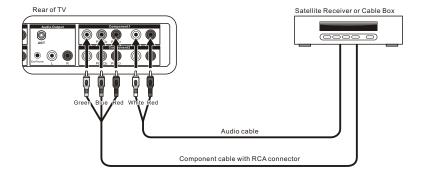

Colors on Component Video connectors:

Y: Green

Pb (also identified as Cb, CB or B-Y): Blue **Pr** (also identified as Cr, CR or R-Y): Red

Note: The Y, Pb and Pr jacks on your Satellite Receiver or Cable Box are sometimes labelled as Y, Cb and Cr, or B-Y and R-Y. If so, connect the cables to the matching colors.

2. Using an Audio cable, connect the Satellite Receiver or Cable Boxes' Audio OUT jacks to the TV's Audio in jacks.

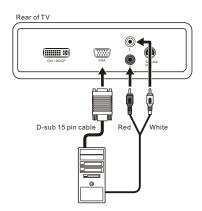

Note: Use this method of connection if your Satellite Receiver or Cable Box has component (Y, Pb, Pr) jacks.

Note: The YPbPrconnection provides the best quality of video signal compared to AV(composite) and S-Video connection.

Connecting to a PC with VGA Connector

⚠ Disconnect all power sources before making any connections.

- Using a D-Sub 15 pincable, connect the VGA output terminal of the PC to the TV's VGA signal input terminal.
- 2. You may need to use a Stereo mini jack to RCA L/R connectors to receive audio.

Connecting to a DVD Player or HD-Receiver with a DVI/HDCP Cable

⚠ Disconnect all power sources before making any connections.

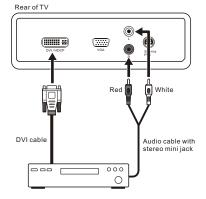

- 1.Using a DVI cable, connect the DVD's DVI output terminal to the TV's DVI-HDCP input terminal.
- 2.Using an Audio cable, connect the DVD's Audio OUT jacks to the TV's Audio IN jacks.

Note: VGA and DVI/HDCP Connectors share the same audio input.

Note: HDCP is acopy protected digital connection that receives analog or digital video signals from equipment with DVI ouput that features the HDCP function. DVI allows the transfer of digital uncompressed data to the TV.

DVI technology is better than Component, S Video or AV (composite) connections.

Note: DVI signal ispurely digital and provides a crystal clear technology better than component, S-Video or Video connections. It is strongly recommended to use this connection if you have this function on your equipment.

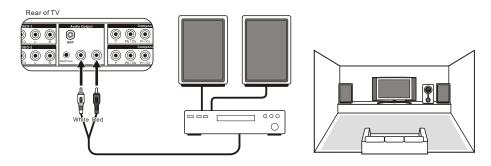

Other Connections

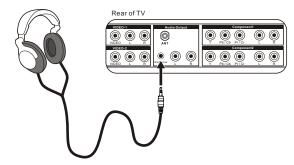

⚠ Disconnect all power sources before making any connections.

See setup instructions for: Connecting to an Audio Receiver on page 15.

Speakers Outputs

Headphone Set

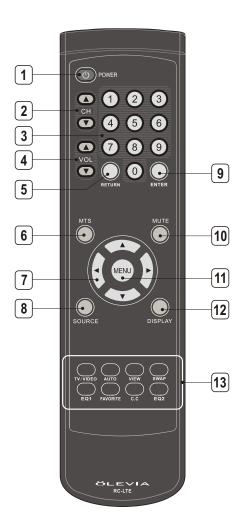

Note: When headphone is plugged in the speaker will turn into mute mode.

Remote Control Guide_

Remote Function Keys & Description

Regular Buttons

- **POWER** Press to turn display on/off.
- 2 CH + / CH- Press to adjust channel up and channel down.
- 3 NUMBER BUTTONS Press the number buttons to select channels on the display.
- 4 VOL+/VOL- Press to adjust the volume.
- **5 RETURN (Channel Return)** Press to return the to previous-channel.
- 6 MTS Press to select from SAP, Mono or Stereo mode
- **buttons (Direction Buttons)** Press to move highlighted selection through menus or submenus.
- SOURCE Press to show the source input from TV 1,AV1, AV 2, SV1,, SV2, YPbPr 1, YPbPr 2, DVI and VGA.
- **9 ENTER** Press to enter the channel number, highlighted menu or submenu item.
- **MUTE** Press to mute the sound.
- MENU Press to activate or close the On Screen Display menu. In OSD Menu, acts as a cancel button while navigating through the OSD.
- **DISPLAY** Press to display the information of current channel number and time.
- Hotkeys Press to directly access certain Shortcut TV functions..

Hot Keys Tutorial

The remote control contains 15 additional "Hotkeys" that represent direct access to a certain function on your TV. Hotkeys enable you to directly change the setting to your preference without having to navigate through the OSD (On Screen Display) Menu.

How to use your Hot Keys

HOT KEYFUNCTION

TV / VIDEOPress to select a video signal from different sources (TV 1, AV 1, AV 2, SV 1,, SV 2, YPbPr 1, YPbPr 2, DVI and VGA).

AUTO (Auto adjustment) Under VGA mode, the screen position could be automatically adjusted by pressing "Auto" button, when the screen image is not centered.

VIEW Press to select and program PIP, Split Screen or viewing options.

SWAP Press to select TV channels betweenmain and subscreen. (This function is only in the PIP and Split Screen modes.)

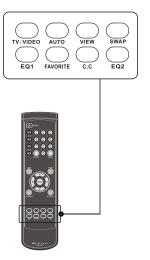

EQ1 This function will provide an environmental effect to the audio for an added live experience.

FAVORITE Press to select favorite channels. Can be preset in OSD Menu.

C.C. Press to call up the Close Caption (CC) and Caption Service (CS) list. You can pre-selectone to see Closed Caption.

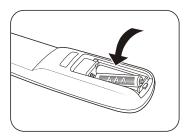

EQ2 This function will provide a preset equalized effect to the audio for added audio definition.

Note: EQ1 and EQ2 selections can be used simultaneously to suite your preference.

Battery Installation

- 1. Push the tab and pull it out as illustrated below.
- Insert two size AAA batteries (supplied) by matching the (+) and (-)
 on the batteries to the diagram inside the remote control's battery
 department.
- Replace the coverback and make sure the cover "snaps" into the remote control.

Note:

- 1. The display unitcomes with two new AAA batteries as accessories. However, due touncontrollable causes, the electricity of the accessorized batteries may be partially or completely drained. We do not warrant the quality of the batteries in any case since many factors are considered. If replacement is needed, please purchase two AAA batteries.
- 2.Handle remote with care. Avoid dropping it, placing in direct sunlight, near a heater, high areas of humidity or getting it wet. If the remote gets wet, please wipe it dry immediately. In the event of the remote not working properly or is inoperational, a replacement of remote control may be required.
- 3.If you do not use the remote control for a long period of time, please remove the batteries and store in a cool place to preserve battery life.
- 4.Do not mix new and used or with differenttypes of batteries for operation.

Adjusting On Screen Displays (OSD).

Introduction

After you have finished connecting your TV, you are now ready to choose and personalize your TV settings in the OSD (On Screen Display) menu.

There are four main sections in the OSD Menu:

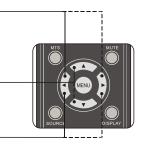

Brightness 50 Contrast 75 Saturation 50 Hue 50 Sharpness 4 Color Temperature Cool Back Light Middle Auto Setting Advance Picture Adjust

To Operate in the OSD

- 1. Press "Menu" button to enter OSD menu mode.
- In Main OSD Menu, use the ▶ and ◀ keysto select and enter each ← main OSD Section: Video; Audio; Miscellaneous; Screen.
 Note: The OSD Section appears at the bottom left corner of the OSD Screen at all times.
- 3. In Each OSD Section, press the ▲ and ▼ to select the function, and the (MENU) button to make an adjustment or selection. ▶
- 4. To adjust the value bar, use the keys ▶ and ◀ •
- After choosing your setting, press the

 to go back into Main OSD Section. To exit, press (MENU) to go back to Main OSD Menu.
- 6. To exitthe OSD menu, press "Menu" until you exit the OSD menu, or without action for 12 seconds of inactivity. This is also adjustable in the OSD.

VIDEO Adjusting TV Picture Settings

Advance Video Quality

In this SetupIndex, you canadjust the video and picture settings to suit your personal preferences.

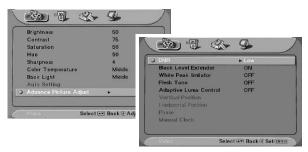

Video Settings

Item	Adjustment	Function
Brightness	0~100	Adjusts picture brightness contrast
Contrast	0~100	Adjusts picture color contrast
Saturation	0~100	Adjusts the color intensity
Hue	0~100	Adjusts the tint orshade of picture
Sharpness	0~100	Adjusts the picture sharpnessor softness
Color temp	Cool / Middle /Warm / User	Adjusts image color intensity.
		Cool: More blue-tinted colors
		Middle: Standard color temperature
		Warm: More red-tinted colors
		User: Allows User toadjust RGB Gain
Red Gain	0~100	Adjusts the colorcontrol with red tones
Green Gain	0~100	Adjusts the colorcontrols with green tones
Blue Gain	0~100	Adjusts the colorcontrols with green tones
Backlight	Bright / Middle /Dark	Adjusts the darkness or lightness of the screen
Auto Setting	Enter	Adjusts OSD Settings backto factory default
Advance Picture Setting	Enter	Adjusts additional specific picturesettings (DNR, Black LevelExtender, White PeakLimitato CTI, Flesh Tone, Adaptive Luma Control)

Advance Video Adjust

To further adjust specific picture settings, enter this function by pressing the ▶ button.

Advance picture setting

Definition of Terms

Item	Status	Description and Function
DNR	Off/Low/Middle/Strong	DNR-Dynamic Noise Reduction. Reduceshigh frequency noise dynamically. Off- Dynamic Noise Reductionis disabled. Low/Middle/StrongSet the DNR inlow/medium/strong degree.
Black Level Extender	On/Off	Black Level Extender -Extends "grays" to black soa more accurate picture isproduced with a widercontrast scale. On-The Black Level Extenderis enabled. Off-The Black Level Extenderis disabled.
White Peak Limitator	On/Off	White Peak Limitator-Limit thesignal amplitude varying degree resulted in frequency increasing or other reasons, and in case ofscreen defocus for white-peak. On-The White Peak Limitator is enabled. Off-The White Peak Limitator is disabled.
Flesh Tone	On/Off	Most LCD TV's videoprocessing solutions have ared push to the their colormatrix. With the FleshTone Controloption it helps to tonedown these strong redsand produce more naturalistic color tones. On-Flesh tone adjustment isenabled. Off-Flesh tone adjustment isdisabled.
Adaptive Luma Control	On/Off	Control the luminance adaptively. On-The Adaptive Lumacontrol feature is enabled. Off-The Adaptive Lumacontrol feature is disabled.

To Adjust Settings:

Use the ▶ and ◀ remote buttons to adjust each Video picture setting, as seen below:

Brightness

Saturation

Hue

To exit, press the Button

To Reset Factory Settings

If, at any time, you wish to go back to original factory setting, you may do so by choosing the Default setting in the OSD Picture and Audio Sections.

Selecting "Default," will reset all OSD settings to the original manufacture settings. The only items which will remain unaffected, are:

- Clock
- Auto Scan Channels
- Edited Channels
- Parental Control Password

Audio Adjusting Sound Quality

Audio setting

Definition of Terms

Item	Adjustment	Function
Treble	-50~50	Adjusts higher pitched sounds
Bass	-50~50	Adjusts lower pitched sounds
Balance	-20~20	Adjusts volume balance inLeft and Right
Surround	On / Off	Creates a panoramic stereoaudio image by producing
		deep and rich basstones and clear trebletones. This
		enables you to enjoypowerful sound effects likethose
		in a movie theatre
Equalizer 1	Off, Concert, Living Room,	Adjusts the sound asoccurred in an enclosed space
	Hall, Arena, Church	of varying spaces
Equalizer 2	Off, Rock, Pop, Live, Classic,	Adjusts the volume of different bands (ranges of
	Soft	frequencies (HZ)) to controlthe overall sound
MTS	Mono, Stereo, SAP	Adjusts sound reception ofstereo, bilingual and mono
		programs under the TVSource.
Speakers	On / Off	Turns off the speakers of the TV when using a
		Receiver or Home TheaterSystem.

ToAdjust Settings:

Use the ▶ and ◀ remote buttons to adjust each Audio sound quality, as seen below:

Treble

Bass

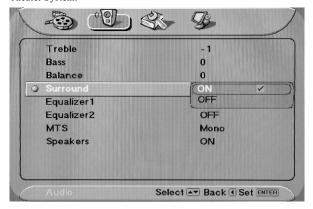

Balance

Surround Sound is an available option for creating a panoramic stereo audio image by producing deep and rich bass tones and clear treble tones. This enables you to enjoy powerful sound effects like those in a movie theater.

Speakers

Must turn offspeakers of the TV when using a Receiver or Home Theater System.

OSD Audio Settings: Equalizer 1

OSD Audio Settings: Equalizer 2

MTS System for Stereo TV

You can enjoy stereo, bilingual and mono programs.

Additionally, you can press the hotkey "MTS" until the desired sound in dication appears. Each time you press the button, the sound indication changes as follows:

Mono, Auto SAP, Stereo

Definition of Terms

Sound Effect	Description
Stereo	Select for stereo reception when viewing a program broadcast
	in stereo
Auto SAP	Select to automatically switch the TV to Secondary Analog
	Program when a signal is received.
	(If no SAP signal is present, the TV remains in Stereo Mode)
Mono	Select for mono reception.
	(Use to reduce noise during weak stereo broadcasts)

MISCELLANEOUS Adjusting Personal TV Settings

In this Section, you can adjust additional TV settings to your personal preference, including channel setup, choosing tuner modes, setting up timer, closed caption services, parental controls, and viewing the OSD in your preferred language.

Description of Settings

Item	Adjustment	Function
Channel Setup		Setting up Channel functions
Channel-Favorite	24 favorite channels setting	Stores the favorite channels
Channel-Skip		Sets up available channels.
		Add: To addavailable channel.
		Skip: To cancelavailable channel

	Password	
Language	English / Deutsch /Francais / Espanol	Switches the OSD language
	Italiano / Portugues / Svenska	5 5
	繁體中文/简中	
Default		Resets OSD setting todefault.

Setting the Channels

After you finish connecting your TV, you can run Auto Scan program to setup your channels. The program will scan and presetall receivable channels automatically.

To Cancel Auto Program

Exit auto scanprogram by pressing "menu" Key.

Note: The AutoScan is setto scan cable TV channels by default. You cannot receive and set the cable TV channels VHF/ UHF channels at the sametime.

Setting Favorites Channels

You can select and store a list of your favorite channel settings. Selected favorite channels are marked with a licon.

You can preset favorite channels on this page. You can also access this function by pressing the "FAVORITE" hotkey on the remote control and selector switch between your favorite channels.

- 1. Enter "Channel-Favorite" mode.
- 2. Press "Edit" to enterthe channel(s) using the number keys.

 You can "Delete" channels per line or "Empty" all channels at once.
- 3. Press "View" to see the selected channel display in real time.
- 4. Press "Enter" to exit when complete.

Watching favorite channels

To watch you favorite channels after specifying your preferences, just press the Hotkey "FAVORITE" to browse through each favorite channel.

Editing Channels

You can also edit channels to your personal preference. Once you edit a channel, it will be skipped when surfing through TV channels.

To Skip or Locka Channel

- 1. Make sure Channel Skip or Channel Lock is highlighted.
- 2.Enter the channel number you wish to skip or lock, or scroll through channels using the ▲ and ▼ Arrow.
- 3.Press "Enter" to make your selection or adjustment.

Note: Youwill see acheckmark next to Skipped Channels, and a small lock icon next to Locked Channels.

To Undo a Skipped or Locked Channel:

- 1. Make sure Channel Skip or Channel Lock is highlighted.
- 2.Enter channel number you wish you undo, or scroll through channels using the ▲ and ▼ Arrow.
- 3.Press "Enter" to make your selection or adjustment.

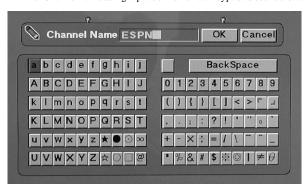

Note: You will NOT see a checkmark next to Skipped Channels, or a small lock icon next to Locked Channels afterwards.

Personal Channel Preferences: Channel Naming

You can also create personal names for each channel, which will show up in the upper Right hand corner of the TV screen.

To Name a Channel:

- 1. Enter Channel Name sub-page
- 2. Enter Channel name using alphabet-numerical keypad as seen below:

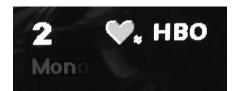

3. Press "Okay" to exit keypad when naming is complete.

Once you have named a channel, your preset channel name will show up on the TV screen when flipping through channels, or by pressing the Display Key.

If you named your favorite channel, you will see the heart icon next to the channel name.

Setting up the TV Timer

To setup the time on the TV:

- 1.Using ▲ and ▼ keys, enter in HH: MM: SS Enter the time using the number keys found on the remote.
- 2.press "Enter" when complete.

NOTE: Clock will NOT BE affected when Factory Default settings are reset. Under Activate, "ON" allows the start/stop time to be ongoing whereas, "ONCE" allows it to only function once.

However, when the power cord is not connected to the TV, you will lose all previous time adjustments.

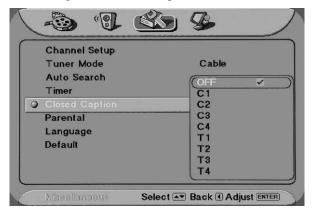

Timer: Start Time / Stop Time

You can set the TV to turn On and/or Offautomatically at a predetermined time through the timer function. Use the Start Time to setup the hour and minute preferences. Your TV will automatically turn on at the settime. Use the Stop Time to setup the hour and minute preferences. Your TV will automatically turn off at the set time.

Note: Alarm WILLBE affected when Factory Default settings are reset.

When the power cord is not connected to the TV, you will lose all previous saved adjustments.

Watching with Closed Caption

You can display closed captioning if the broadcaster offers this service.

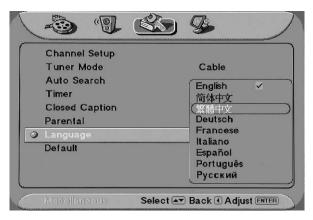

Close Caption option can be set On/Off from the OSD page. This function also can be accessed by pressing "C.C" hotkey on the remote control.

- 1. Not all programs offer the Closed Caption option.
- Closed Caption may not be seen clearly (white blocks, strange characters, etc.) if the signal condition is poor, or if there are technical difficulties with the broadcaster.
- 3. If no TEXT broadcast is being received while viewing in the [TEXT] mode, the screen may become dark and blank for some programs. Switch Off the Closed Caption mode.

TV OSD Languages

There are nine language formats available for the OSD Menu. You may choose from the following:

English, Chinese Traditional, Chinese Simplified, Spanish, French, German, Portugese, Italian and Russian.

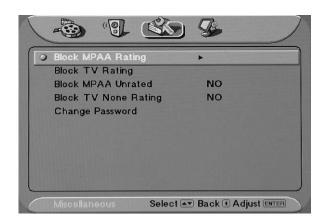

Using the Parental Control Feature

To block programs you feel unsuitable for your children, you need to Set the TV for desired rating systems. The TV Parental Control feature functions by receiving the rating signal from your local broadcasting station or cable service provider.

The TV programs and movies shown on TV are given a rating signal based on the following rating systems.

In U.S.A.: U.S. Television Parental Guidelines to rate television programs (U.S. TVRatings) and Motion Picture Association of America (MPAA) Guidelines to rate movies including those shown on TV (Movie ratings).

In Canada: Canadian English Language ratings to rate television programs in English, and Canadian French Language ratings to rate those in French.

Parental Control

- This function allows programs to be restricted and controlled by parents based on FCC regulation. It prevents children from watching program contents that may be prohibited by parents.
- 2. Restriction of programs is based on three Rating Systems: MPAA Rating, TV (Child) Rating and TV (Entire Audience) Rating.

 The MPAA Rating restricts based on age. TV (Child) rating and TV (Entire Audience) Rating restrict based on age and contents.
- 3. When you block the lower rating, the higher age-based ratings are blocked automatically.
- When youenter "Parental control" mode, those messages display for different state.

The Parental Control Main Menu contains four options in the following categories:

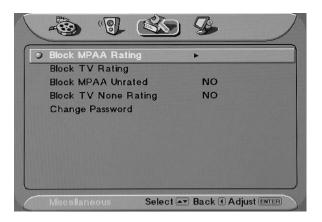

- 1.MPAARating
- 2.TV Rating
- 3.MPAAUnrated
- 4.TV Unrating

Activating the Parental Control Feature

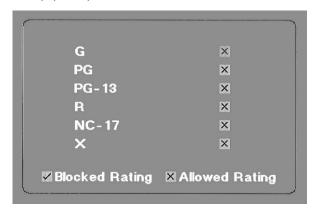

Once you enter the highlighted section of Parental Control, you will have to enteryour password. The Factory Default password is "9999". Once you enter the Parental Control Menu, you may change the password to your personal preference.

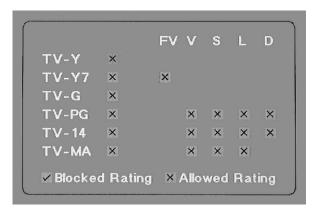

To setup, enter each sub-menu to setup your parental controlled TV channels.

MPAARating controls channels and movies that are rated from G, PG-13, R, NC-17, and X.

TV Rating controls channels and movies that have been rated from TV-Y, TV Y-7, TV-G, TV-PG, TV-14, and TV-MA.

To Block Unrated Channels

Youmay choose "YES" for Block MPAA Unrated and Block TVNone Rating. This will lock you from accessing any channels that do not contain MPAA or TV Ratings. To watchunrated channels, re-activate Block MPAA Unrated and Block TVNone Rating to "NO".

Setting up Parental Control Password

Enter the password sub-page. Enter the current password. If this is the first time, you do not have to enter a password.

You will have to enter and confirm your password before changing to a new password. Please keep password within 4 numbers.

If you enterthe incorrect password, you will see an error page.

Please re-enter the new password and confirmation password again.

Note: If you forgetthe password, press "9999" to liftthe Password lock and change to a new preferred password.

Factory Default Option

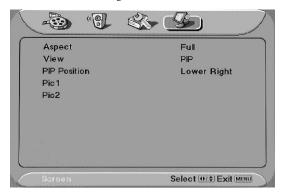

Reset Factory Settings:

Initiating Factory Defaultwill reset all OSD settings to original manufacture settings. The only items, which will remain unaffected are:

- Clock
- Auto Scan Channels
- Edited Channels
- Parental Control Password

Adjusting Screen Modes

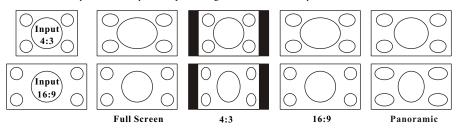

There are two option in the Screen Modes, "aspect & "View." Apect will allow user to select different aspectratios, whereas, View will all different modes of viewing 1 or 2 sources.

Changing the Screen Mode

You can alter the aspect ratio of a picture by choosing between these four options:

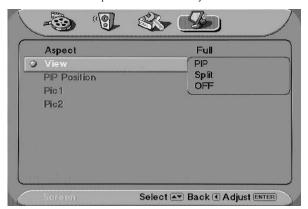

Full Screen Enlarges the picture to 16:9 wide mode, by stretching the picture horizontally only.

- 4:3 Returns the 4:3 picture to its original size. This is considered the "normal" viewing mode.
- 16:9 Enlarges (zoom-in) the size of a 4:3 picture on screen as geometric ratio, keeping the original image as much as possible.

Panoramic select to widen the displayed image. (only applies to content larger than 16:9)

Changing the View Modes

You can select four view types of picture modes that best suits the program you are watching. You can set a different view mode for each video mode for each input and store it manually.

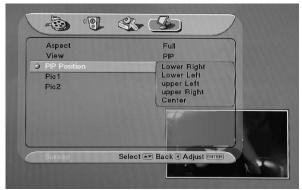

View Modes	Function
PIP	Picture-in-Picture has a Main screen and small screen view
Split Screen	Full Screen split in two Views

Picture in Picture (PIP)

Allows you to view a main screen (Picture 1) and a secondary small screen (Picture 2).

Press 'source' button to switch from P1 to P2 and vice versa.

You may also choose the settings of P1 and P2 as well as the position of P2 on screen.

OSD View

TV View

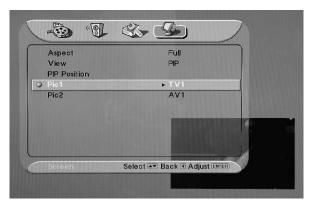

Pic1 Pic2

PIP mode

You may adjust setting for each Picture source. Pic 1 allows for a TV, AV1, AV2 and DVI sources while Pic2 supports all other input sources.

Ite	em	Adjustment	Function
PI	IP Position	Upper Left / Upper Right /	Changes the position of Picture 2
		Lower Left / Lower Right	
PI	IP-Pic1	TV1,AV1, AV2, DVI	Switches the source of Picture 1
PI	IP-Pic2	AV1, AV2, S-Video1,	Switches the source of Picture 2
		S-Video2, YpbPr1, YpbPr2,	
		DVI, VGA	

Note: Pic 1 allows for a TV, AV1, AV2 and DVI. Pic 2 allows for all sources except TV or if you are already using one of the other sources from Pic 1.

When you use the swap function, the signals from the main window and the PIP window will swap positions no matter what sources you specified on either window.

Split Screen

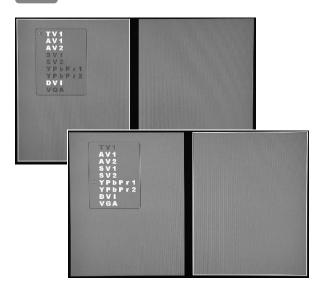

Allows you to view two separate screens simultaneously (Picture 1 and Picture 2).

Press 'source' button to switch from P1 to P2 and vice versa.

OSD View

TV View

Split Screen mode

You may adjust setting for each Picture source. Only Pic1 supports a TV input source, while Pic2 supports all other TV input sources.

Item	Adjustment	Function
Pic1	TV1, AV1,AV2, DVI	Switches the source of Picture 1
Pic2	AV1, AV2, S-Video1,	Switches the source of Picture 2
	S-Video2, YpbPr1, YpbPr2,	
	DVI, VGA	

Note: Pic 1 allows for a TV, AV1, AV2 and DVI. Pic 2 allows for all sources except TV or if you are already using one of the other sources from Pic 1.

When you use the swap function, the signals from the main window and the PIP window will swap positions no matter what sources you specified on either window.

Syntax's D.O.A. Policy for LCD TVs for Defective Pixels on LCD Panels

(Applicable to the LCD TV sold within USA & Canada only)

Syntax™ LCD TVs are evaluated at a distance of approximately 50 centimeters (approximately 20 inches) between the LCD panel and the eyes of theuser at a 90 degrees viewing angle. All LCD panelshave been tested to ensure they comply with our factory standards. Our evaluation is based on the number of defective pixels and the distance between any two defective pixels. Bright dots are dots that appear bright and unchanged in size when a LCDTV screen displays under a blackpattern; dark dots are dots that appear dark and unchanged in size when a LCD TV screen is displayed underpure red, green, or blue patterns ("defective pixels"). Adjacent dots are dots located directly next to each other.

Customers are required tocheck their LCD panel immediately after purchase. To identify defective pixels, the LCD panel should be examined under normal operating conditions as mentioned above, preferably in its native display resolution, and with a 90 degrees viewing angle.

A LCDTV will be considereddead on arrival (D.O.A.) with regards to defective pixels on the LCD panel when any one of the following criteria is met:

- A total of 7 defective pixels including both bright dots and dark dots are present (the typical 30"LCD Television screen has 16.7 million pixels), or
- 2 or more pairs of adjacent bright dots are present, or
- 3 adjacent bright dots are present, or
- 3 adjacent dark dots are present.

In view of customers'concerns about dead pixels, Syntax would like toaddress that defective pixels are not ultimately avoidable with the current LCD industry standard panel manufacturing processes. We always strive to improve our technology and minimize the chance of occurrence of defective pixels by applying strict screening processes in our factory production processes. However, Syntax cannot guarantee that a returnunit to our customers will be 100% free of defective pixels.

For questions, please callour toll free service number in the USAat 888-SYNTAX-8.

"At SyntaxGroups, a satisfied customer is our most important focus."

Glossary

3:2 pull down - Process of converting 24 frames per second film to video by repeating one film frame as three fields, then the next film frame as two fields.

1	1	1	2	2	1	1	1	2	2
			_	-					

480I - 480 lines of display every 1/60 of a second; image is displayed by interlace scanning. See also Interlaced

480P - 480 lines of display every 1/60 of a second; image is displayed by progressive scanning. See also Progressive.

720P - 720 lines of display every 1/60 of a second; image is displayed by progressive scanning. See also Progressive.

1080I - 540 lines of display x 2 every 1/30 of a second; image is displayed by interlace scanning. See also Interlaced

16:9 - Aspect ratio under Hi Def. and theater movie formats. Also known as widescreen; see Aspect Ratio

4:3 - Aspect ratio under SDTV; see Aspect Ratio

Active Matrix TFT (Thin Film Transfer) - A type of display technology where the three primary colors are modulated. Results in better contrast ratios suitable for video.

Alarm - Feature on the Syntax Olevia models. Allows the unit to power on from the stand by mode.

Alarm Time - Time specified as to when the unit will power on. See Alarm.

Aspect Ratio - The ratio of an image according to the width and height of a picture.

ATSC - Advanced Television Systems Committee; international, non-profit organization that is committed to developing standards for digital television.

Reference: http://www.atsc.org

Bezel - Refers to the plastic or metal frame that acts like a shell around the LCD glass.

Backlight - Refers to the component, that lights up the LCD display.

Balance - Feature on the OSD for the Syntax Olevia models that adjust the left and right sound output from the speakers.

Background - Feature on the OSD for the Syntax Olevia models, which allows the user to change the OSD background, display to transparent or opaque.

Brightness - The measurement of color that is illuminated. Colors range from black to white.

CATV - Community Antenna Television (Cable Television)

Channel Favorite - Feature on the OSD for the Syntax Olevia models that allows the user to scroll through a defined list of channels that the user sets up.

Channel Edit - Feature on the OSD for the Syntax Olevia models that allows the user add or delete a channel

Channel Source - Feature on the OSD for the Syntax Olevia models that lets the user select the source of their channels. Select TV for antennae or CATV for cable television.

Channel Auto Scan - Feature on the OSD for the Syntax Olevia models that when initiated, will determine which channels are available and which are not. If a desired channel is not accessible, you can add the channel in manually. See Channel Edit.

Channel Fine Tune - Feature on the OSD for the Syntax Olevia models that enables the user to tune the channel for better reception.

Chroma - (Chrominance) Refers to the color characteristics of a video signal.

CC - Closed Caption

Color - The term refers to the amount of color present. This varies between each user, as each person perceives colors differently.

Color Temperature - Feature on the OSD for the Syntax Olevia models that enables warm, normal or cool color settings. Warm emphasizes red, cool emphasizes blue, and normal doesn't emphasize any of the primary colors. This setting may affect each person individually depending on how color is perceived.

Comb Filter - A filtering system designed to removal unwanted artifacts by rejecting certain frequencies while permitting others.

Component - A three RCA type input that uses high quality cables (one for brightness, and two for color). Process increases bandwidth resulting in more color information to be carried to the TV producing a more accurate picture.

Composite - Also known as CVBS, Technology that permits the combination of color information and brightness under one wire. A single video signal that carries both brightness and color information are contained in a single wire.

Contrast - Difference in luminance between the white and black colors.

CRT - Cathode Ray Tube.

DB15 - Also referred to as VGA: See VGA

De-Interlace - Process of converting an interlaced video signal.

Display Area - The perimeter of the LCD glass the image is displayed on. See Video Resolution **Dual Link** - See Single Link; Supports a maximum bandwidth of 2×165 MHz (1920 $\times 1080$ @ 60 Hz, 1280×1024 @ 85 Hz).

DVI - Digital Video Interface Describes the technology that is used to take full advantage of a signal when paired with a high-end video card and flat panel displays

DVI-A - Digital Video Hi-Resolution Analog

DVI-D - Digital Video Interface Digital; Cable is used for direct connection from one digital source to the TV; See DVI

DVI-I - Digital Video Interface Integrated; Cable that supports analog and digital signals; See DVI **DTV** - Digital Television

Factory Default - Feature on the OSD for the Syntax Olevia models that resets all menu options to factory default.

F-Connector - The standard connector found on video equipments that coaxial cables connect to.

Flat-Panel Display - ultra thin displays, usually found in notebooks are now entering the TV appliances sector as new technology enables wider/larger screens.

Frame - A complete picture that includes both even and odd lines. 30 video frames are present in 1 second.

Gain - Describes the amplification level of a particular signal.

HDCP - High bandwidth Digital Content Protection

HDTV - 1.High Definition Television 2. Designates as the unit having a built in ATSC tuner to decode High Definition signals (720P/1080I).

HD-Ready - A unit that supports the High Definition displays (720P/1080I) with the help of a Set-Top Box.

Horizontal Resolution - Refers to the number of vertical black and white lines defined along a horizontal line.

IR - Infrared

Input - term used in the On Screen Display

Interlaced - Images are the result of lines of data reassembled. Interlaced refers to the process of an image's odd lines reassembled from top to bottom taking about 1/60 of a second, before reassembling the even lines which results in a full picture. Antonym: Progressive

Language - Feature on the OSD for the Syntax Olevia models that enables the OSD to be read in different languages.

LCD - Liquid Crystal Display

LCoS - Liquid Crystal on Silicon

LED - Light Emitting Diode

Luminance - refers to the brightness of an image.

Lux - 1 Lux = 1 footcandle; measurement of brightness

Moire - A visual illusion in which a succession of parallel curved lines produces a pattern to the naked eye, but does not really exist. Otherwise known as the moire effect.

NCTA - National Cable Television Association

Noise reduction - Feature on the OSD for the Syntax Olevia models that enables channels from the tuner box to reduce noise displayed on the LCD unit.

NTSC - National Television systems Committee

OSD - On Screen Display; brought up by pressing the menu button on the TV or the Remote.

Over Scanning - An image displayed is larger than the display area

PAL - Phase Alternating Line

Parental Control - The ability to block access to specified content from an unsuitable audience.

PIP - Picture in Picture; feature that enables one source to be displayed on top of another source.

Pixel Resolution - Refers to the number of rows horizontal and vertical that produces the image.

PIP - Picture in Picture; Allows an image to be displayed in front of another image.

Plug and Play - Describes the hardware or software that is installed and does not require any configuration before using.

Progressive - An image or lines of data that is reassembled from top to bottom sequentially.

Antonym: Interlaced

RGB - Red, green & blue These primary colors provide the basis for many different colors.

Refresh Rate - Refers to the maximum number of frames that the monitor can display per second. Usually measured in hertz.

Saturation - The amount of a particular color present in an image.

SCART - An industry standard for interconnecting audio-video equipment developed by Peritel. Usually associated with PAL video equipment.

SDTV - Standard Definition Television usually in 480I/P format.

SECAM - Sequential Color with Memory or Sequential Couleur Avec Memoire

Set-Top-Box - box that is capable of receiving and decoding digital transmissions (i.e. High Definition Cable Box, Digital Cable box).

Sharpness - Tries to artificially enhance the edges of a picture.

Single Link - supports a maximum bandwidth of 165 MHz

(1920 x 1080 @ 60 Hz, 1280 x 1024 @ 85 Hz).

Split screen - Feature that places two images side by side.

1	2

Swap - Button featured on the Olevia remote. Used in the POP3 or PIP12 views to swap the sub viewable boxes with the main viewable box.

Tint - Adjusts the whiteness level within the color. Similar to Hue.

Under- scanning Term used where the image displayed is smaller than the display area.

Up convert - Process of converting a 480P/I signals to 720P or 1080I.

V-Chip - Chip that controls access to forbidden content specified by an adult.

VGA - 1. Video Graphics Array (DB15) 2.

Video Display - Refers to the display resolution

Video Resolution

Aspect R	atio 4:3	Aspect Ratio 16:9		
VGA	640 x 480		WXGA	1280 X 800
SVGA	800 x 600		SXGA	1280 X 1024
XGA	1024 x 768		WXGA+	1400 X 1050
QVGA	1280 x 960		WSXGA	1680 X 1050
SXGA+	1400 x 1050		WUXGA	1920 X 1200
UXGA	1600 x 1200		QSXGA	2560 X 2048
QXGA	2048 x 1536			
QSXGA+	2800 x 2100			
QUXGA	3200 x 2400			

Viewable Angle - Angle at which the screen is still viewable.

Widescreen - See 16:9

YCbCr - Used often with standard interlaced video equipment. See Component

YPbPr - Used often with progressive video equipment. See Component
